

Web Solutions Developer

Job Type:	Permanent, Full Time
Department:	Professional Services
Location:	Montreal, Canada
Reporting to:	The Solutions Engineer will report to the Jahia Professional Service department and geographically to the General Manager, Jahia North America.
Start Date:	Immediately

Job Description

The professional services activities are critical to our success, and we are looking for a talented solution engineer to join our team.

The most important criteria for this position are:

- Ability to deliver quality work on time and on budget
- Matching customer expectations in delivering the best possible implementation of our product
- Ability to manage customer relationship throughout a project
- Firm grasp of how the web works

We are very interested in individuals who have a track record of finding creative solutions to unique problems, and who will thrive in challenging situations. The Solution Engineer is responsible for providing high-quality software integration for Jahia customers across the US/Canada and Europe.

Function

- The successful candidate will work closely with our customers and partners for the integration of the Jahia product
- The candidate will assist the customer or third party integrator in delivering quality technical specifications that will be translated into functional features that can be developed as part of the product capabilities
- Responsibilities include assisting the customer in setting up an adequate technical architecture that matches his requirements
- Other responsibilities include training for our partners and customers
- Candidate should be willing to travel occasionally (up to 30%) on the respective continent and to some extent, intercontinental.

More detailed tasks

- Develop and integrate our product on any Jahia compatible middleware -customer's preferred stack
- Provide expertise and best practices on solutions development on top of Jahia
- Work within our international Professional Services team and form close relations with our product team
- Train partners and customers on Advanced Jahia Development Techniques
- Provide feedback to our product team on integration issues
- Assist existing customer in migrating to newer releases of our product
- Provide support to existing customer on production projects

Skills

- 5 years (minimum) of J2EE development experience
- Strong knowledge in JSP/HTML/CSS
- Strong knowledge in technical consultancy and software integration,
- Desirable: Strong knowledge of Content Management Systems
- Desirable: Strong knowledge of Enterprise Application Server such as IBM Websphere, Oracle Weblogic or JBoss

Personal profile

- Candidate must be comfortable working distantly with an international team and with customers spread out throughout North America –and, to some extent, Europe
- Fluent English is necessary (English as a mother tongue preferred)
